DEBASISH PANDA

AI AUTOMATION ENGINEER | LLM INTEGRATION | MCP & RAG | WORKFLOW ENGINEERING

Kolkata, India | +91 8391908845 | debasishpanda622@gmail.com
linkedin.com/in/debasish-panda845

PROFESSIONAL SUMMARY

AI automation and business systems professional experienced in designing, implementing and deploying multi-step workflows that connect business applications, APIs and LLM-powered services. Delivered recruitment, training-operations and AI-assisted assessment workflows at a consultancy, including a production grading system built around RAG, Supabase pgvector, OpenAI text embeddings and trainer approval. Combines process analysis and solution design with hands-on integration, testing and deployment. Uses AI-assisted development tools to accelerate code implementation while retaining responsibility for architecture, configuration, validation and delivery.

TECHNICAL SKILLS

Automation & orchestration: Microsoft Power Automate (Cloud and Desktop), multi-application workflows, document processing, workflow design

AI & LLM integration: LLM API integration, OpenAI text embeddings, RAG, MCP-based integrations/workflows, prompt and context design

Data & platforms: Supabase, PostgreSQL, pgvector, REST/HTTP APIs, Outlook, Excel, SharePoint, Zoom

Analytics: Power BI (Intermediate), SQL (Intermediate), Advanced Excel (Intermediate), Python (Intermediate)

Business & delivery: Process mapping, requirements analysis, solution design, testing, workflow documentation, stakeholder coordination

AI-assisted development: Claude Code (primary), OpenAI Codex, Google Antigravity

PROFESSIONAL EXPERIENCE

Chelson Gordon Consultancy | *Data Analyst* | *April 2026 – Present*

- Design and deliver business-process automations across recruitment, training operations and assessment workflows.
- Build integrations using Power Automate, HTTP/REST API requests and LLM services; connect applications including Outlook, Excel and SharePoint.
- Translate operational requirements into workflow designs, configure integrations, validate outputs, troubleshoot issues and support production deployment.
- Use AI-assisted development tools to accelerate implementation and debugging; retain ownership of solution design, configuration, testing and delivery.

SEORB Digital Solutions | *Business Analyst* | *September 2025 – December 2025*

- Analysed workflows for two digital products, identified process gaps and supported improvements to feature delivery.
- Gathered requirements and translated them into structured task flows and development documentation.
- Prepared process documentation and coordinated information across parallel workstreams and stakeholders.

SELECTED PROJECTS

AI-Powered Assessment Grading & Automation | Production deployment

- Designed and deployed an AI-assisted grading workflow using RAG, Supabase (PostgreSQL/pgvector), OpenAI text embeddings, LLM API integration and MCP-based workflows.
- Built a searchable knowledge base from assessment resources, including approximately 650 qualification units, 16,000+ learning/reference materials, 7,000+ sample workbooks and 1,000+ guides; the corpus contains 400,000+ extracted passages.
- Automated the workflow from knowledge retrieval and AI-assisted grading through trainer review/approval to result upload, retaining a human-in-the-loop quality gate.
- Processed 5,000 student assessments in the first nine days after production deployment (user-reported operational metric).

HR Recruitment Workflow Automation

- Automated recruitment administration from resume collection through candidate confirmation/rejection communications and related documentation emails.
- Connected workflow steps across business applications to reduce repetitive manual handling; reported approximately 40% time savings.

Zoom Class Scheduling & Communication Automation

- Automated Zoom meeting-link creation through trainer accounts and distribution to the student announcement system and email channels.
- Reduced manual scheduling and communication effort; reported time savings of more than 50%.

EDUCATION

- MBA, Business Analytics and Data Science | EIILM-Kolkata | July 2024 – August 2026
- Bachelor of Business Administration (BBA) | Completed June 2023

CERTIFICATIONS

Data Visualization and Business Intelligence • DBMS with SQL • Business Analysis Techniques for Business Transformation • Machine Learning Using Python
